PROBLEM TO BE SOLVED: To cooperatively and effectively execute office work between remote places to improve the intelligent productivity of an office and to form an environment enabling a user to suppose the use of a large office in moving or at his (or her) home.

SOLUTION: In the system, a terminal equipment is provided with high speed remote control software 7. The software 7 consists of an 'Windows' (registered trademark) OS, 'Reach-out' (product name of Soliton Systems Inc.) and a multicomunication protocol 21. The protocol 21 enables users to access a telephone network, an ISDN (registered trademark) network, a radio network, or an LAN and execute operation and cooperative work at remote offices.
